

## President John F. Kennedy's nephew challenges the official Covid-19 narrative.

Robert F. Kennedy Jr, the nephew of assassinated US President John F. Kennedy, has developed a global reputation as a legal defender of the environment and champion of childrens' health.

Now an acclaimed senior US Attorney, during the Covid-19 pandemic he has bravely spoken out against authoritarian propaganda and censorship, highlighted significant vaccine harm concerns and railed against state lockdowns and the alleged corruption of international pharmaceutical companies.

His recent book **"The Real Anthony Fauci"** (Bill Gates, Big Pharma and the global war on democracy and public health) published by *Children's Health Defense* gives a compelling insight into corporate vested interests, potential corruption at the *World Health Organisation*, compromised vaccine safety and the real threat to democratic institutions.

See link below for Robert F. Kennedy's captivating outdoor speech in Berlin on 29<sup>th</sup> August 2020.
