

## [Robert F. Kennedy Jr to run for 2024 US Presidency](#)

### **The White House, Washington, USA**

Robert F. Kennedy Jr, the nephew of assassinated USA President John F. Kennedy, has recently filed paperwork with the *Federal Election Commission* registering his intention to run for the 2024 USA presidency (see attached link below).

<https://docquery.fec.gov/cgi-bin/forms/C00836916/1696048>

Robert, aged 69, is an eminent environmental lawyer, author and also founder of the *Children's Health Defence* (a not-for-profit group which raises concerns about the harm to children including autism and cancer caused by factors such as vaccines, 5G Wi-Fi and the fluoridation of drinking water). He has consistently advocated for protection of the environment and the defence of the rights of indigenous people.

In the 1990's he successfully sued New York City and *Exxon Mobil* (an American multi-national oil and gas corporation) on behalf of the Hudson River keepers to stop the discharge of pollution and foul sewage into the Hudson River. The subsequent *New York City Watershed Agreement 1997* has been hailed globally as a model of sustainable development.

In 1990 Robert helped the indigenous **Pehuenches** people, who live in the Andes, Chile to stop the construction of a series of dams on the *Biobio River*; in 1996 he worked closely with Mexican fishermen to halt Mitsubishi's proposed industrial facility in **Laguna San Ignacio**, a coastal area where Grey whales breed; in 2000 he conscientiously assisted environmental activists to stop a huge hotel resort being developed near precious coral reefs off **New Providence Island** in the Bahamas and in 2001 he fearlessly litigated against the US Navy to stop weapons testing and bombing off the Island of **Vieques** in Puerto Rico (Robert personally took part in a protest at the US Navy training facility, Camp Garcia Vieques and served 30 days in

prison for trespass although happily the campaigning eventually lead President George Bush to terminate US naval bombing in Vieques).

An outspoken opponent of Covid lockdown restrictions and vaccine mandates in 2020 and 2021, Robert has also highlighted alleged corruption between international governments and big pharmaceutical companies (for example in his recent book "**The Real Anthony Fauci : Bill Gates, Big Pharma and the Global War on Democracy and Public Health**") and has been highly critical of the censorship and suppression of freedom of speech by social media giants such as *Facebook*.

### **Robert F. Kennedy Jr speaks at an open air rally in Berlin on 29<sup>th</sup> August 2020**

Clearly, now that he is a contender with Joe Biden for the Democratic nomination, Robert is guaranteed extensive media publicity over the next year which will provide a great opportunity for him to passionately champion transparency, truth and social justice.

Good Luck!
